CAREER OBJECTIVE

Full-Stack Software Engineer with 1+ years of professional experience specializing in TypeScript-based architectures (NestJS & Angular) and high-performance databases like PostgreSQL and Cassandra. Beyond my core stack, I am a highly adaptable developer with a proven ability to rapidly master new technologies and embrace complex technical challenges. I am dedicated to building clean, scalable backend systems and optimizing performance to solve real-world problems in fast-paced, evolving environments.

PROGRAMMING & TECHNICAL SKILLS

- Languages: TypeScript, JavaScript, C, C#, SQL, HTML5, CSS3
- Frontend: Angular, RxJS, Material UI, DevExtreme, PrimeNG
- Backend: Node.js, NestJS, Prisma, Drizzle, Cassandra (NoSQL, TypeScript Driver), RESTful APIs
- Database Management: Cassandra (NoSQL), PostgreSQL (Relational)
- Tools & DevOps: Git, GitHub, Bitbucket, Postman, TablePlus, Swagger
- Methodologies: Agile/Scrum, Microservices Architecture, SOLID Principles
- Problem Solving: 200+ problems solved on Beecrowd; expert in DSA, OOP, and scalable Database Schema Design
- Technical Agility: Rapidly adopts new tech stacks and IDEs (e.g., Cursor); proficient in Jira workflows and high-quality Swagger documentation

PROFESSIONAL EXPERIENCE

BENGAL MOBILE QA SOLUTION

JUNIOR SOFTWARE ENGINEER

ASSOCIATE SOFTWARE ENGINEER

July 2025 – Present

March 2025 – June 2025

Contributed to three core internal products (Hope, Shohay, Otithi), taking end-to-end ownership of significant backend and frontend features in a Microservices architecture.

- Architecture: Architected multi-tenancy features for Shohay Enterprise, enabling scalable onboarding of multiple corporate clients.
- Search Optimization: Owned Corporate Pledging Flow and integrated Elasticsearch, optimizing data retrieval latency by 40%.
- Feature Ownership: Delivered full-cycle NGO Profile and Hotel/Property modules (DB to Frontend), ensuring 100% milestone completion.
- API Efficiency: Developed 100+ CRUD APIs and automated Provider Checklists, streamlining operations for 50+ service providers.
- UI & Performance: Redesigned dashboards using Angular/PrimeNG and resolved critical bugs, ensuring 99.9% system uptime.
- Collaboration: Actively engaged in Agile/Scrum and code reviews, ensuring high maintainability and timely delivery of complex solutions

PROJECTS

MEDIQ

Architected a scalable **SaaS** platform using a **shared database/separate schema** approach for **data isolation**. Implemented a secure onboarding workflow with **OTP verification**, **RBAC**, and a **real-time POS & Inventory** system using Node.js and PostgreSQL.

HOTEL TICKETING SYSTEM (BACKEND)

Engineered a robust backend with NestJS and Prisma ORM, featuring a modular architecture with **custom Guards, Interceptors, and Decorators**. Implemented secure **JWT-based RBAC**, 30+ documented API endpoints, and advanced **filtering/pagination**, ensuring reliability through **Jest unit testing**.

E-COMMERCE REST API

Developed a comprehensive e-commerce backend focusing on **relational data integrity** and efficient order processing. Implemented complex relationships between Users, Products, Categories, and Orders using Prisma ORM, while ensuring clean and maintainable code through NestJS modular patterns.

EVENTIFY

Developed a comprehensive event management platform as a **C# console application** using **OOP principles**. The application allows users to explore **available venues and organizers**, **create events**, **issue tickets**, and **book tickets**.

TO DO APP

Using **Flutter, Hive**

Implemented features for **adding, marking completion, and deleting tasks**, showcasing expertise in mobile app development and **UI/UX design**. Demonstrates a commitment to practical solutions and improved productivity.

EDUCATION

BSC IN SOFTWARE ENGINEERING

2020-2023

DAFFODIL INTERNATIONAL UNIVERSITY

CGPA - 3.44 out of 4.00
